Summary

Driven by a dual passion for creation and protection in the digital realm. As a Computer Science student at Graphic Era University, I am building a strong foundation to not just write code, but to write secure code. My goal is to become a guardian in the cybersecurity landscape, anticipating threats and fortifying defenses. My interests are a unique blend of precision and passion: • Cybersecurity & Tech: The intellectual battlefield where I want to build my career. • Automotive Engineering (Petrolhead): I admire the complex, mechanical symphony of high-performance vehicles—a perfect analog counterpart to my digital pursuits. • High-Fidelity Audio (Audiophile): I appreciate the clarity and detail in sound, a principle I carry into writing clean, efficient code. I am actively seeking internships, projects, and networking opportunities to bridge the gap between academic theory and real-world application. Open to conversations about technology, innovation, and the intersections of our passions! #CybersecurityStudent #ComputerScience #Tech #Audiophile #CarEnthusiast #GEU #Learner

Education

Graphic Era Deemed to be University

Bachelor of Technology - BTech, Computer Engineering · (August
2024 - August 2028)
